

# Thanks for purchasing.

This file includes 4 different PSD files.

Editing and replacing your content very easy.

1- Open any file in Photoshop.

2- You will see just 2 layers. One of them called “ <<REPLACE YOUR CONTENT”.

3- Right click on this layer and say “EDIT CONTENT” from menu. Or you can double click icon of this layer.

4- Say YES this attention.

5- When a new window opens, you will a 2 layers again. You must do same things. Select “ AGAIN “ layer and do it again.

6- A new window will open. And here you can paste your content easily. You can scale or move around. Open guides and see focus area. Because out of this guided area content will get a depth of fields.

7- After pasting your content SAVE and CLOSE 2 windows. You will see your content engraved on the wood floor.

That's it. Enjoy.
